PIOTR KAŻMIERCZAK, PhD

PROFILE

A philosopher and logician turned engineer with a keen interest in distributed systems, a solid academic background in multi-agent systems, formal logic and game theory, and a growing experience in distributed computing.

SKILLS

Golang, Python, Linux, AWS, GCP, K8S

EXPERIENCE

MessageBird (YCS16) – *Software Engineer (Amsterdam, NL)*

FEB 2018 – SEP 2019

- Development of microservices (Go) hosted on GCP/K8S.
- Dataflow (Apache Beam) pipeline design and engineering.

Fineway – *Data Engineer (Munich, DE)*

JUL 2017 – JAN 2018

- AWS architecture, implementation and maintenance.
- Python backend engineering with Django Rest Framework.

SUSE Linux – *Software Engineer (Nuremberg, DE)*

FEB 2017 – JUN 2017

- SUSE Manager team member and backend developer.
- Salt integration and upstream contributions.

Cloudreach – *Systems Engineer (Munich, DE)*

MAY 2015 – JAN 2017

- AWS consultant. Puppet, Ansible, Cloudformation, Terraform, Splunk, ELK.
- Python/Golang/Javascript microservice development.

Høgskulen på Vestlandet – *Research Fellow (Bergen, NO)*

MAR 2010 – JUL 2014

- Research assistant during a PhD programme at the University of Bergen.
- TA in algorithms, software verification, grid computing and discrete mathematics for BSc and MSc in computer engineering students.

Gazeta.pl – *Systems Engineer (Warsaw, PL)*

OCT 2007 – AUG 2008

- UNIX/Linux sysadmin, Perl scripting and internal support.
- Oracle PL/SQL programming and DB administration.

EDUCATION

University of Bergen, Bergen, NO – *PhD Information Science*

MAR 2010 – MAY 2015

Thesis: “Agents That Play By the Rules”

Dissertation about coordination problems in multiagent systems, specifically on using logical and game theoretic tools within the “social laws” paradigm, as introduced by Shoham & Tennenholtz.

[DBLP record](#), [Google Scholar profile](#). Full list available on my website.

University of Warsaw, Warsaw, PL – *MA+BA Philosophy*

OCT 2004 – OCT 2009

Thesis: “On Tableau Systems for Some Modal Logics”

Thesis in proof theory. Introduces a new, fully deterministic, tableau-based decision procedure for modal logic K, easily adaptable to many other normal modal logics. Thesis and defense were both awarded top grade A.

KU Leuven, Leuven, BE – *Erasmus Exchange Student*

SEP 2008 – JUN 2009

A two-semester scholarship awarded by the Institute of Philosophy, Warsaw University. Courses: Analytic philosophy, decision theory, theology of interreligious dialogue, cognitive science, theory of knowledge, and other.

OTHER

Languages

Polish (native), English (full professional proficiency), and German (basic/A2).

Hobbies

Jazz, classical music and road cycling. I played first violin for Unplugged Orchestra during 2004–2008 and second violin for University of Bergen symphonic orchestra in 2012. I raced in Bergen-Voss 2012 and 2013.

Blogging

I write a personal blog that sometimes covers technical topics. Two of my posts appeared on the front page of HackerNews: “In Defense Of The PhD” and “A Eulogy for Maemo/MeeGo”.
